

ACCELERATING BREAKTHROUGHS. SECURING INNOVATION FROM GROUND CONTROL TO COMMUNICATION GRIDS.

AEROSPACE & DEFENSE

Sector Proposition

In defense-critical environments, excellence isn't optional. we partner with government entities and aerospace innovators to engineer secure, scalable technologies that deliver mission assurance, rapid innovation, and national capability reinforcement—across land, air, and space.

Key Capabilities

Software Defined Radio (SDR) Platforms

Predictive Maintenance for Fleet Readiness

Automated Test Equipment (ATE) for Mission-Critical QA

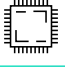

Cybersecurity Infrastructure & Secure Communications

Tactical Data Acquisition & Monitoring Systems

Our Approach

Stage	What It Delivers	
 Research & Concept	Strategic alignment with defense needs	
 Design & Engineering	Resilient system architectures for complex environments	
 Prototyping & Testing	Stress-tested validation for reliability assurance	
 Production & Implementation	Secure field deployment and readiness integration	
 Deployment & Integration	Scalable operations and lifecycle compatibility	
 Continuous Improvement	Evolving solutions to stay ahead of emerging threats	

Value Delivered

Secure field communication and encrypted system integrity

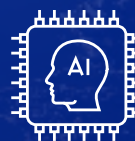

Up to 80% faster deployment of defense-grade technologies

Enhanced operational reliability and fleet uptime

Real-time data acquisition for mission clarity

Localized systems aligned with sovereign modernization goals

Why SAAB RDS

Trusted partner
in national defense
transformation

Proven success
across encrypted
SDR and mission-
grade platforms

Seamless integration
with legacy and
next-gen systems

Engineering-first
mindset for risk
mitigation and
operational security

Your Defense Innovation Partner.
